We've all been there—you moved to a new home or apartment, and it's time to set up electronics and components. Except, when you didn't think you'd need the user manuals online. Visit the Product Manufacturer's WebsiteDepending on the age of the product is you're using, chances are you'll be able to find the user manual for it online. Many manufacturers will post the user manual for it online in a searchable database so consumers can download them in .pdf form. You'll need to look at the product, determine its serial number or other identifying marks to perform the search. Then, you should be able to find the user manuals for free. When individuals need help troubleshooting or setting up products, they'll go to forums for help. Many of the technicians or other users who work with these individuals will post free product manuals to help consumers resolve their issues. So, if you're unable to find a Magic Chef user manual on the product manufacturer's website, for example, you may be able to find something in a help forum. Use a Website Databases are available containing free product user manuals online. The majority of these searchable product databases act like a traditional search engine and don't require a user registration or login. All you have to do is enter the product information you're looking for and hit enter. Then, a list of search results appear similarly to a traditional search engine. Use a Traditional Search EngineIf you're having difficulty with manufacturer websites, help forums or databases, you can opt for searching the Internet the traditional way. Using this method will reveal where other discussion forums, blogs and websites are explaining trusted websites, so you're not downloading a virus inadvertently. Check Out Do-it-Yourself WebsitesWhen do-it-yourself websites are explaining how to build or troubleshoot something, they'll often post instructions or links to PDFs for free product manuals. So, if you're trying to figure out how to fix your refrigerator or dishwasher, visiting a do-it-yourself website may lead you toward the user manuals you couldn't find previously. MORE FROM QUESTIONSANSWERED.NET 5th Grade Volume as Layers - 5.MD.C.5a and 5.MD.C.5bby These 2 image-filled worksheets focus on the concept of V = B x h. Students should understand that volume can be calculated by finding the the number of unit cubes in one layer, then multiplying that quantity by the number of layers (height). Keys are provided.Adding One More Layer Volume Worksheet - This worksheet includes many pictures designed to reinforce that concept that V = B × h for rectangular prisms to find volumes of right rectangular prisms with whole-number edge lengths. Students"V" is for Volume is a hands on activity that teaches young students how to find volume of solid rectangular prisms. Students will use building blocks (cubes) or connecting cubes to build each shape given on the recording sheet. The higher level students may use multiplication to find the volume and check their answer by actually counting the cubes in the figure they built. Primary students may build the figure, then take it apart in layers as they count the blocks or cubes.
